

NRPP Measurement Professional Exam 150 questions

Below are the two sections of the exam and the domains and subdomains with % of the exam questions and number of questions in each domain.

Measurement Field Technician: 85 questions

Domain 1: Communicate with the Client		17%
1.1	Communication basic radon risks	7
1.2	Explain required test protocols	8

Domain 2: Evaluate the Test Site		24%
2.1	Determine appropriate test protocol	8
2.2	Recognize factors that could impact test results	7
2.3	Inspect existing mitigation system	5

Domain 3: Perform the Test		28%
3.1	Determine proper device placement location(s)	13
3.2	Execute field quality control measures	11

Domain 4: Keep Records		14%
4.1	Record radon test data	6
4.2	Record site data necessary for test interpretation	6

Domain 5: Operate in an Ethical/Professional Manner		17%
5.1	Comply with protocols and standards	8
5.2	Observe ethical work practices	6

Measurement Professional: 65 questions

Domain 1: Communicate Basic Radon Science		18%
1.1	Communicate health risk	4
1.2	Communicate radon entry behavior	3
1.3	Recommend testing approach	5

Domain 2: Conduct and Validate Measurement Data		25%
2.1	Select appropriate test device(s)	5
2.2	Assess radon measurement data	7

2.3 Interpret site data	5
--------------------------------	---

Domain 3: Report Findings and Make Recommendations	21%
-----------------------------------------------------------	------------

3.1 Prepare a proper test report	5
3.2 Make follow-up recommendations	4
3.3 Report site factors affecting radon results	4

Domain 4: Manage QA/QC Program	19%
---------------------------------------	------------

4.1 Develop QA plan and SOPs	6
4.2 Execute QA plans	6

Domain 5: Oversee and Train Measurement Techs	17%
------------------------------------------------------	------------

5.1 Determine work exposure	3
5.2 Provide tech oversight	8
